About IGEA

IGEA Pharma N.V. focuses on health-tech and med-tech products and devices. Health-tech products are exclusively preventative. IGEA commercializes an Alzheimer's prevention set (which includes 'Alz1', an at-home lab test kit to measure non-bound copper in the blood and a natural dietary supplement branded 'Alz1 Tab' designed to reduce blood heavy metals content), and intends to launch a diabetes type II prevention set in 2020. Non-ceruloplasmin bound copper is an expected Alzheimer's and diabetes type II associated biomarker. Controlling non-bound copper can contribute to reduce the risk of Alzheimer's and diabetes type II. Since 2020, IGEA furthermore commercializes a COVID-19 rapid test for the detection of IgM and IgG SARS-CoV-2 related antibodies. Med-tech products focuses on selected solutions and specialities. IGEA commercializes dry aerosol generators for air and inanimate environmental surfaces sanitization and air sterilization and purification devices and expects to start commercializing medical bags and other polymeric based specialty devices for medical use during 2020.
